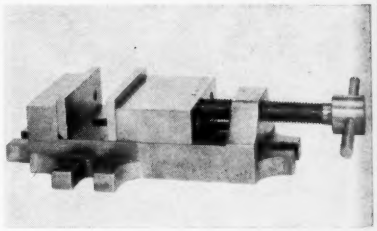
Redesigned to Withstanc Years of Service

This new "student-proof" potters wheel has been designed specifically for schools and institutions, but it may also prove ideal for hobbyists and certain commercial pottery operations. Operated by a treadle, the "throwing" head, splash pan, leaning plate and other smaller components are made from aluminum mounted on a steel frame.

The 16-inch throwing head of Elco model 100-A potters wheel will accommoderate large or small work, and the pan measuring 30 x 24 x 8 inches prevents ceramic materials from dropping on the floor. Elco Welding and Engineering Co., 4471 Santa Monica Blvd., Los Angeles 29, Calif.

Machine Tool Vise Kit Offers Shop Project



Ideal as a project in various milling, drilling and boring operations, this kit produces a sturdy, attractive milling machine and drill press vise. The kit comes complete with all necessary materials including castings, steel, fasteners, dimensional prints and easy-to-follow instructions.

The entire project can be produced on a standard milling machine, with the exception of the screw, which may be either turned on a lathe or die
